

NetVault: FASTRecover[®]™

FAST FACTS

- *Eliminates backup windows for Exchange, SQL Server and Windows File Servers*
- *Provides extremely fast recovery to practically any-point-in-time; even when failing over*
- *Flexible deployment options allow for software-only or pre-configured appliance*
- *Recover or failover to physical server or virtual machine*
- *Integrates with traditional backup applications, including BakBone's NetVault: Backup*
- *Reduces network contention*
- *Optional granular recovery of individual mailboxes or mailbox items without performing brick-level backups*

At last – there's a cost effective way to eliminate backup windows for Microsoft Exchange, SQL Server and Windows File Servers while providing extremely fast recovery to practically any-point-in-time. NetVault: FASTRecover, available as software-only or appliance-based solutions also lets administrators overcome performance, failed job and media management issues. With NetVault: FASTRecover organizations of all sizes can ensure that data within their mission critical applications is properly protected. This means that processes tied directly to revenue generation and customer service are protected and available without the major headaches of ever-increasing backup windows.

KEY BENEFITS

Elimination of Backup Windows

NetVault: FASTRecover eliminates one of your organization's biggest data protection challenges – your backup windows for critical data. NetVault: FASTRecover provides disk-based, real-time data protection for your Exchange, SQL Server and Windows File Servers. NetVault: FASTRecover also reduces network contention because it's always on - capturing and backing-up byte-level changes in your environment as they occur. Imagine the peace of mind you will realize by no longer having to worry about your backup windows.

Simple Plug-and-Play Deployment

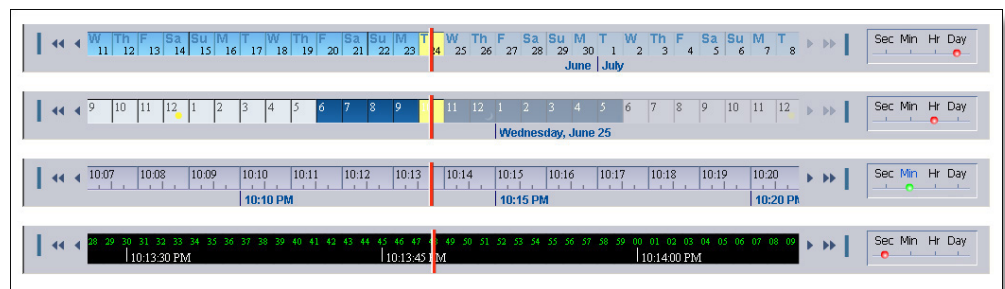

NetVault: FASTRecover provides flexible deployment options – available as a software-only solution that integrates with your existing systems and storage or as a pre-configured appliance that includes hardware, software and storage. NetVault: FASTRecover appliances provide cost-effective plug-and-play options to reduce the level of expertise required during initial deployment as well as ongoing administration. Small, medium or large; BakBone has an appliance offering to meet the needs of your organization. Plug one in and experience the power of simplicity today.

Lightning Fast Recovery of Data

NetVault: FASTRecover provides lightning fast recovery of your data. With a few clicks of the mouse, your users will be back in business in a flash. NetVault: FASTRecover's Virtual On-Demand Recovery technology makes these critical applications and its associated data available for use in as little as 30 seconds. Recovered data is completely useable by the application on first recovery – eliminating wasted time and multiple recovery attempts.

Minimizes Costs by Integrating with Your Existing Backup Application

With off-site backups being an important part of the data protection plan for any business-critical application, NetVault: FASTRecover's integration with traditional backup solutions including NetVault: Backup, gives users the confidence that the recovery data stored in NetVault: FASTRecover's Online Storage is protected and stored offsite.

Turn back the clock to any-point-in-time by moving the NetVault: FASTRecover Timeline Indicator. Zoom the Timeline to view Exchange, SQL Server and Windows file system data for a particular day, hour, minute or second.

SYSTEM REQUIREMENTS

Protected Data Versions

Exchange 2007 & 2003
SQL Server 2008, 2005 & 2000

Protected Data Platforms

Windows 2008, 2003 & 2000

NETVAULT: FASTRECOVER APPLIANCES

Model	Max NVFR Clients	Cluster Support	Server Type	CPU	Memory	Network	OS Storage	NVFR Online Storage
Model 2000	3	No	2U Rack	Intel Xeon Quad-Core E5405 with 12MB of L2 Cache	16GB	1Dual Port NIC	2x RAID 1 160 GB SATA drive	4x1TB SATA in RAID 1+0 Config (2TB Usable Storage)
Model 5000	6	No	2U Rack	Intel Xeon Quad-Core E5405 with 12MB of L2 Cache	32GB	1Dual Port NIC	2x RAID 1 160 GB SATA drive	10x1TB SATA in RAID 1+0 Config (8TB Usable Storage)
Model 10000 with Fibre Channel Option	25	Yes	2U Rack	Intel Xeon Quad-Core E5405 with 12MB of L2 Cache	32GB	6 Port NIC + 2 Dual Port Fibre Channel	2x RAID 1 160 GB SATA drive	Not Included
Model 10000 with iSCSI Option	25	Yes	2U Rack	Intel Xeon Quad-Core E5405 with 12MB of L2 Cache	32GB	6 Port NIC	2x RAID 1 160 GB SATA drive	Not Included

Note: Specifications subject to change without notice.

BakBone's Universal Data Management Strategy

Universal Data Management allows a company to directly control and apply policies to data, regardless of which applications create, utilize or interface with that data. Customers can apply policies and control data in both structured repositories or as data dynamically moves across the network.

- **Integrated Data Protection –**

The availability, retention, and security of data. BakBone's combined suite of data protection solutions allow customers to flexibly protect and make their most critical server and application data available, regardless of whether the data resides in physical, virtual or cloud environments.

- **Centralized Policy Management –**

Provides a data-centric approach to creating, applying and maintaining policies across the enterprise. BakBone's Policy Management solutions will allow enterprises to apply and manage their policies on data, rather than on multiple disparate applications.

- **Message Management –**

Providing the ultimate in visibility, control and performance for messaging in the enterprise, BakBone's Message Management solutions will allow companies to leverage Integrated Data Protection and Centralized Policy Management using a flexible and sophisticated routing platform for data in motion.

About BakBone

BakBone Software is the leader in Universal Data Management. This provides a data-centric approach to integrating data protection, centralizing policy management and managing organizations' messaging infrastructure to optimize performance, increase data availability and improve corporate compliance.
