

Highlights:
 With Simpana® software and the ContentStore, you will be able to efficiently and securely protect, recover, manage and access your data.

1. **Slash risk** with a secure and integrated approach to storing, searching and retrieving information
2. **Reduce complexity and cost** with a single index for all backup and archive, built-in automation, deduplication and reporting and the freedom to choose the storage hardware that best meets your needs across heterogeneous and commodity disk storage, tape and into public or private clouds
3. **Drive productivity** with anytime, anywhere self-service access increased access to information
4. **Plan for the future** by using tools to track and trend capacity usage and by freeing yourself from hardware lock-in
5. **Improve service levels** by finding granular information within snapshot, backup and archive data within the ContentStore

Turn Data Into an Asset with Simpana® ContentStore

Achieve Maximum Efficiency, Productivity and Protection by Capturing Data Once, Understanding It and Using It in Many Ways

CommVault® Simpana® software helps your business grow and run optimally—even in the face of ever-increasing volumes of data. You will possess unprecedented flexibility, efficiency, access and scale in how you protect, manage and use your information thanks to Simpana 10's singular architecture and ContentStore, the hardware-agnostic, secure, virtual repository where all backup and archive data is maintained.

ContentStore eliminates inefficient data silos that waste resources and infrastructure by consolidating managed data and automating retention and tiering according to the policies you define. A single, intelligent index provides global awareness for your data and multiple methods for retrieving information make accessing data easy, so you can quickly find what you need, when you need it. You will free yourself from being locked into any particular hardware for data retention while helping to ensure you can meet compliance, governance, eDiscovery, recovery and data mining requirements. ContentStore delivers information to the fingertips of those who need it for the better productivity, faster recovery, improved collaboration and smarter decision making that can transform your business.

KEY CAPABILITIES AND BENEFITS

Single Platform Data & Information Management Solution

Backup, Recovery, Replication, Archiving, Search and Reporting through a single console and software code base. Recover and access data wherever it resides, including granularly for items like mailboxes, messages, folders, contacts, calendar items, files, databases and more.

4th Generation Deduplication

Leverage source and target-based, global deduplication to significantly reduces overall storage and network usage for backup and archive data including the ability to dedupe to the cloud and tape. Scale from small, individual deduplication nodes up to large, multi-node databases with embedded, 4th generation, grid-based architecture deduplication.

Self-Service Access

Search, view and retrieve managed data from virtually anywhere and any device, including through mobile apps, a web console and plug-ins for direct access from Outlook, vCenter and Windows Explorer.

Embedded Encryption

Within the ContentStore, granular and customizable access controls, single sign-on, FIPS certified encryption, alerting, and audit trails keep your information secure.

Support Public and Private Cloud Strategies

Seamlessly, securely and efficiently extend information contained in the ContentStore to private and public cloud locations.

Integrated Reporting

Continuously improve operations, cut costs and gain insights into your environment with integrated data analytics and reporting that can be performed from the index. You can gain insights across your environment, including better classifying data and implementing archive policies for data tiering to lower cost media, helping you further reduce total cost of ownership.

Simplified eDiscovery and Compliance

With ContentStore's reusable, common data repository, legal and compliance teams can perform self-service requests, reducing the time, risk and costs of eDiscovery and Compliance. Automate retention and legal holds across all Electronically Stored Information (ESI) with a single policy, from a single pane. Streamline the collection, preservation and discovery of information in a single, secure repository, making it easy to meet compliance, legal and recovery requirements.

Consulting and Professional Services

Augment staff, train your team, or simply find solutions to unexpected problems. CommVault works closely with customers and partners to enable right size/right costs options that minimize Time to Value.
